Subject: RE: Started my job! - Thanks very much

Hi Neelima,

I also want to thank my java guru, Mr. Abhijeet, who's mentoring helped me master the advanced java/J2ee foundations. Even though it was fast track, he explained all the advanced items with examples. His mentoring played a crucial role in helping me meet the client deliverables. Despite his busy schedule, he used to take time to clarify all the critical issues I had.

Also, I like to thank, Mr. Omkar, whose knowledge sessions helped me a lot. He explained all the important items in detail. He was never annoyed by issues I bring to his attention. He answered all my concerns patiently. I use most of the techniques shared by him and was able to impress the clients.

Thanks to Ravi for all the support given to me.

At last, thanks to entire Vedic team.

Before I end, let me thank my resource coordinator, Shika, for doing such a wonderful job. I highly recommend Shika due to her hard work and dedication for the job.

Regards,

Sijith
